🪪 ABOUT ME

I am a web developer primarily focused on frontend development, with additional knowledge in backend technologies. I am also a student, currently pursuing my degree with 95% of the courses successfully completed.

💼 EXPERIENCIA

Kinefitness, Freelancer Developer
2023 – Present | General Ramirez, Argentina

Technologies Used: Laravel, Livewire, MySQL

I am currently working on the development of a multi-user web system with a client-server architecture using Laravel. This is also the final project I need to present in order to graduate from my degree.

Gloria Montoya Library, Freelancer Developer
2024 – Present | Paraná, Argentina

Technologies Used: Laravel, Livewire, MySQL.

One of my recent projects involved developing a website that allows users to view artworks and books from a museum. It also provides information about the artists and authors. The website will continue to evolve over time.

Public Prosecutor's Office, Pasante
2023 – 2024 | Paraná, Argentina

Technologies Used:
Typescript, Next.js, MUI Component Library, JsonForms, Nest.js, GraphQL, MinioJS, MongoDB, Keycloak.

During this internship, I was responsible for developing new functionalities, defining interfaces, and creating functional generic components using MUI Component Library + JsonForms + React.js. These components were then integrated into the main system, which communicates with various microservices. The system primarily uses GraphQL with a Nest.js server, where we additionally configured a login service with Keycloak and a file storage service with MinioJS.

🧠 SKILLS

Frontend Web Development
HTML, CSS y Javascript

Frameworks
Next Js, Laravel

Version Control System
Git, Github, Gitlab

Knowledge in Other Technologies
Prisma Client, Eloquent ORM, Livewire 3, MUI Component Library, MySql, API Graphql + Nest js + Mongo DB, Bootstrap

Programming Languages
Javascript, PHP
